EXPERIENCE

I.T. Administrator/Webmaster

June 2022 – September 2022

Visible Minority Resettlement and Training Network (VMRTN)

- Achieved business goals by implementing front end technologies like HTML, CSS and Javascript to improve the usability of the website.
- Aided in the successful training and implementation of new software to all company employees
- Performed tests of functionality, security and performance of different workstations and devices to avoid vulnerabilities
- Conducted research on software and current technologies that would aid business processes and achieve business goals

PROJECTS

SmartStylist

- Currently developing an application that uses Google Cloud Storage, Google Cloud Vision API, Firebase, Python and React to recommend outfit pairings from a closet based off of the system's analysis of a database of outfit inspiration pictures.

Personal Portfolio

- Built a personal portfolio website deployed on Github using my knowledge in HTML, CSS and Javascript that contains information about myself, my resume and my projects

Project Euphoria

- Built a web app using knowledge in HTML, CSS and Javascript that allows users to view randomized motivational quotes and reminders that are organized based off of the user's current mood.

Project Picture

- Programmed a web app using my knowledge in HTML, CSS and Javascript that allows users to upload a photo and apply a filter that I created to their picture.

EXTRACURRICULARS

- Model United Nations Delegate
- Toronto Metropolitan University Orientation Week Leader
- Nigerian Canadian Muslim Association Events Team Volunteer
